

# GENESIS

**Its not a question of  
Science verses Religion**

**Two belief systems, (religions)**

**Two 'world views'**

**Two frames of reference**

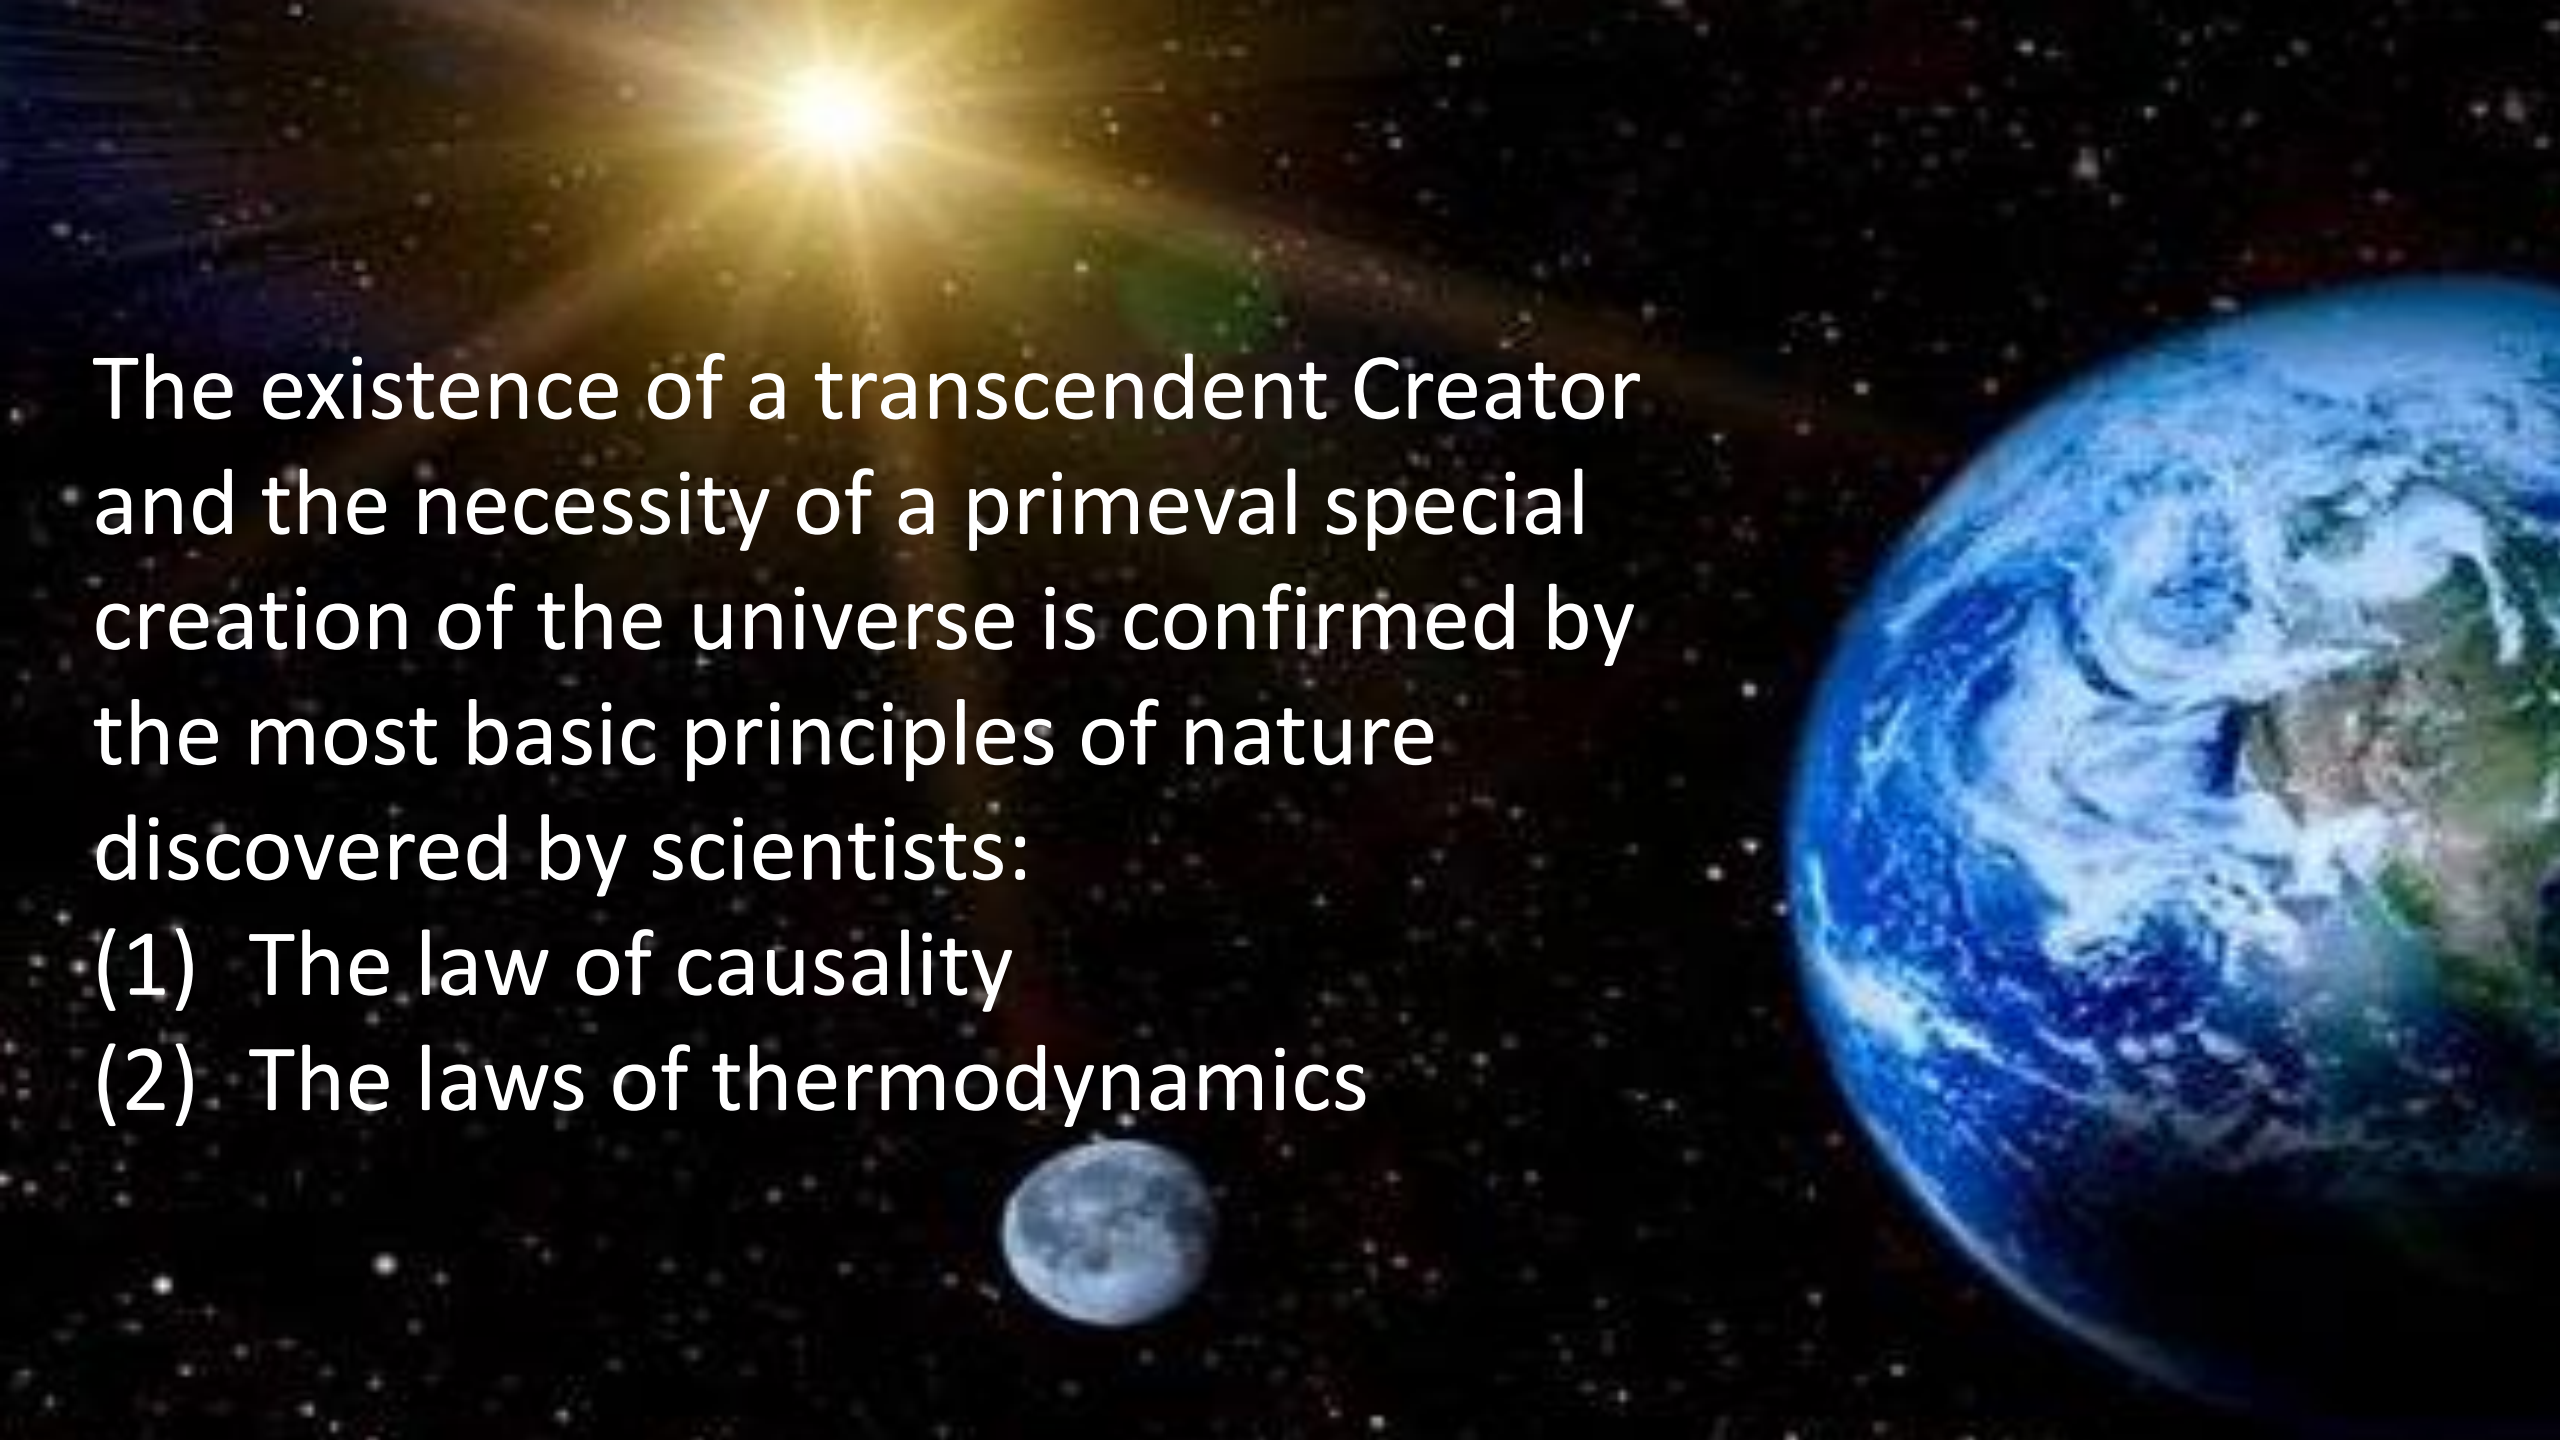

**GOD *or* NO GOD**

**We can apply all the Scientific applications and data to each of these.**

**So the new question is which Theory is more probable based upon a Scientific study of all the information and evidence we have to work with.**

The existence of a transcendent Creator and the necessity of a primeval special creation of the universe is confirmed by the most basic principles of nature discovered by scientists:

- (1) The law of causality
- (2) The laws of thermodynamics

***If you look for me  
wholeheartedly, you will  
find me.***

**Jeremiah 29:11-13**

THREE Events  
That  
CAN NOT BE  
IGNORED!

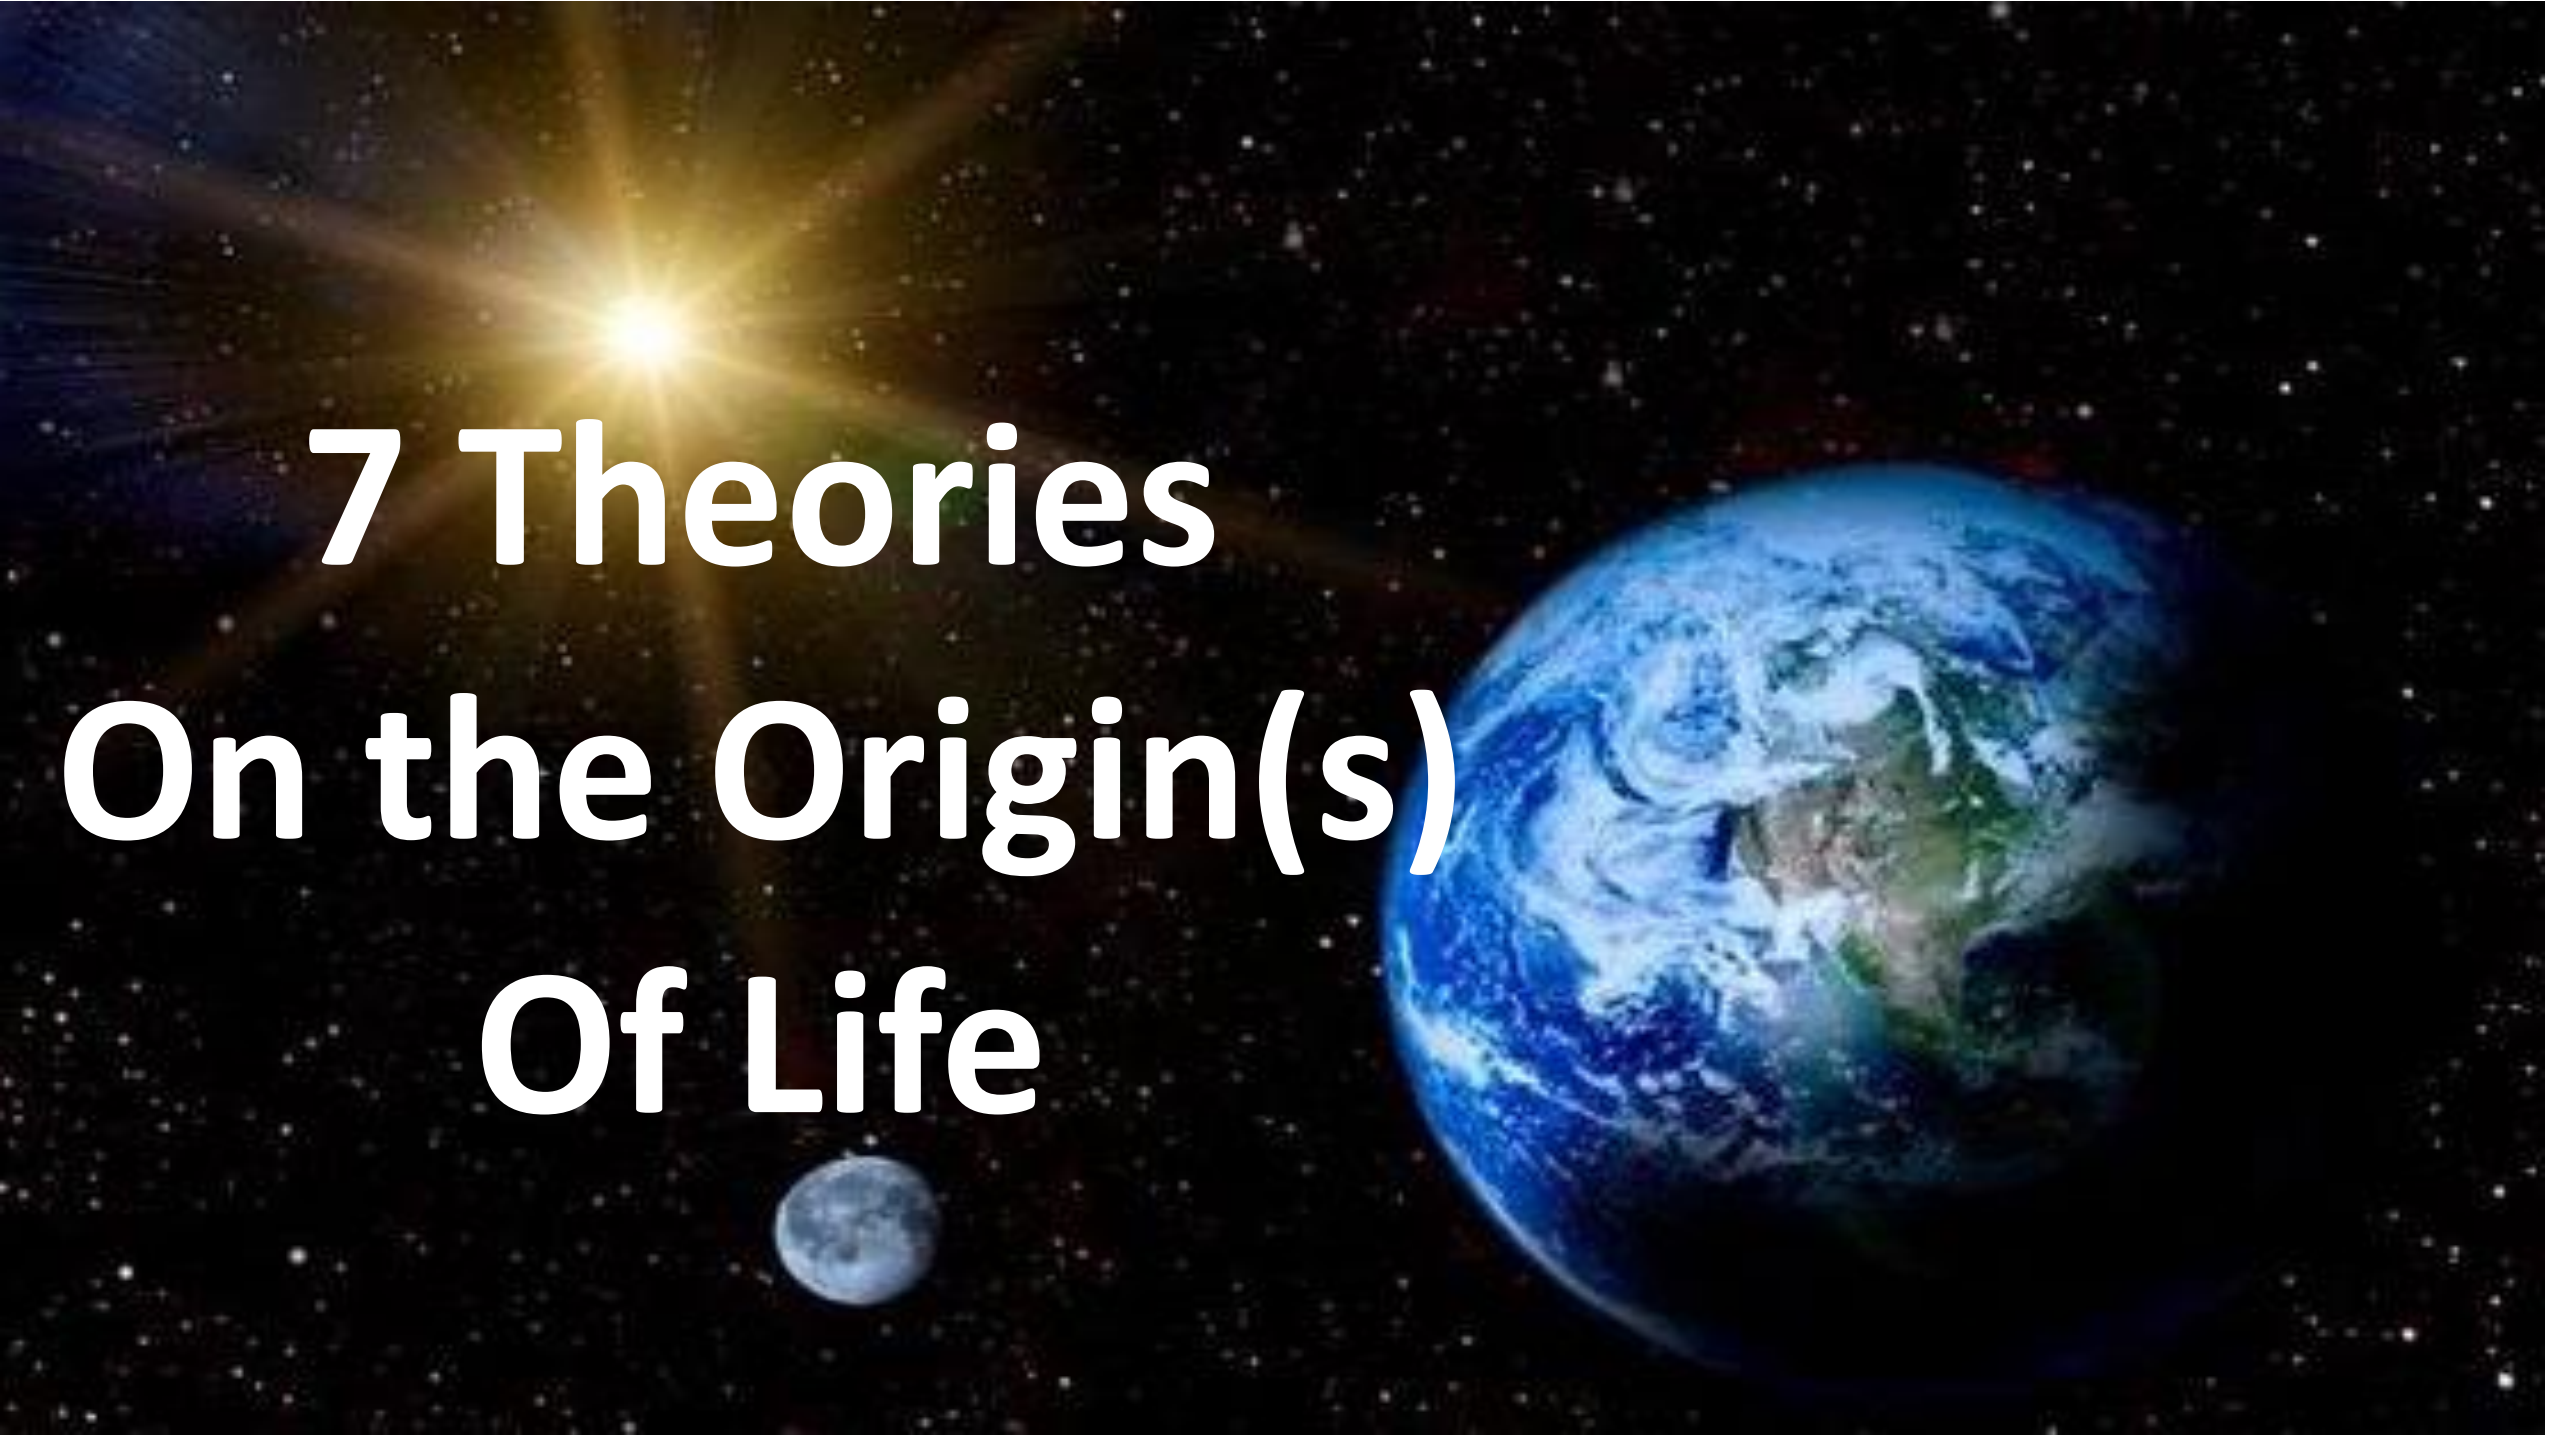

# THE UNIVERSE YOU JESUS' RESURRECTION

A composite image of space. In the upper left, a bright yellow sun with a lens flare shines against a dark background filled with stars. On the right side, a large, detailed Earth is shown, displaying blue oceans, white clouds, and green landmasses. Below the Earth, a smaller, grey, cratered Moon is visible. The word "LIFE" is superimposed in the center-left in a large, white, blocky font.

# LIFE

A cosmic background featuring a bright yellow sun in the upper left, a large blue and green Earth in the lower right, and a smaller grey Moon in the lower left. The background is a dark space filled with numerous white stars.

# 7 Theories On the Origin(s) Of Life

**Electric Spark:** Inspired by the [Miller-Urey](#) experiment of 1953, this theory suggests that lightning interacting with methane gas in the earth's atmosphere created amino acids.

**Community Clay:** This is the idea that mineral crystals in clay helped organize the first living cells.

**Deep-Sea Vents:** Some people believe life began in the hydrogen-rich environment of submarine, hydrothermal vents.

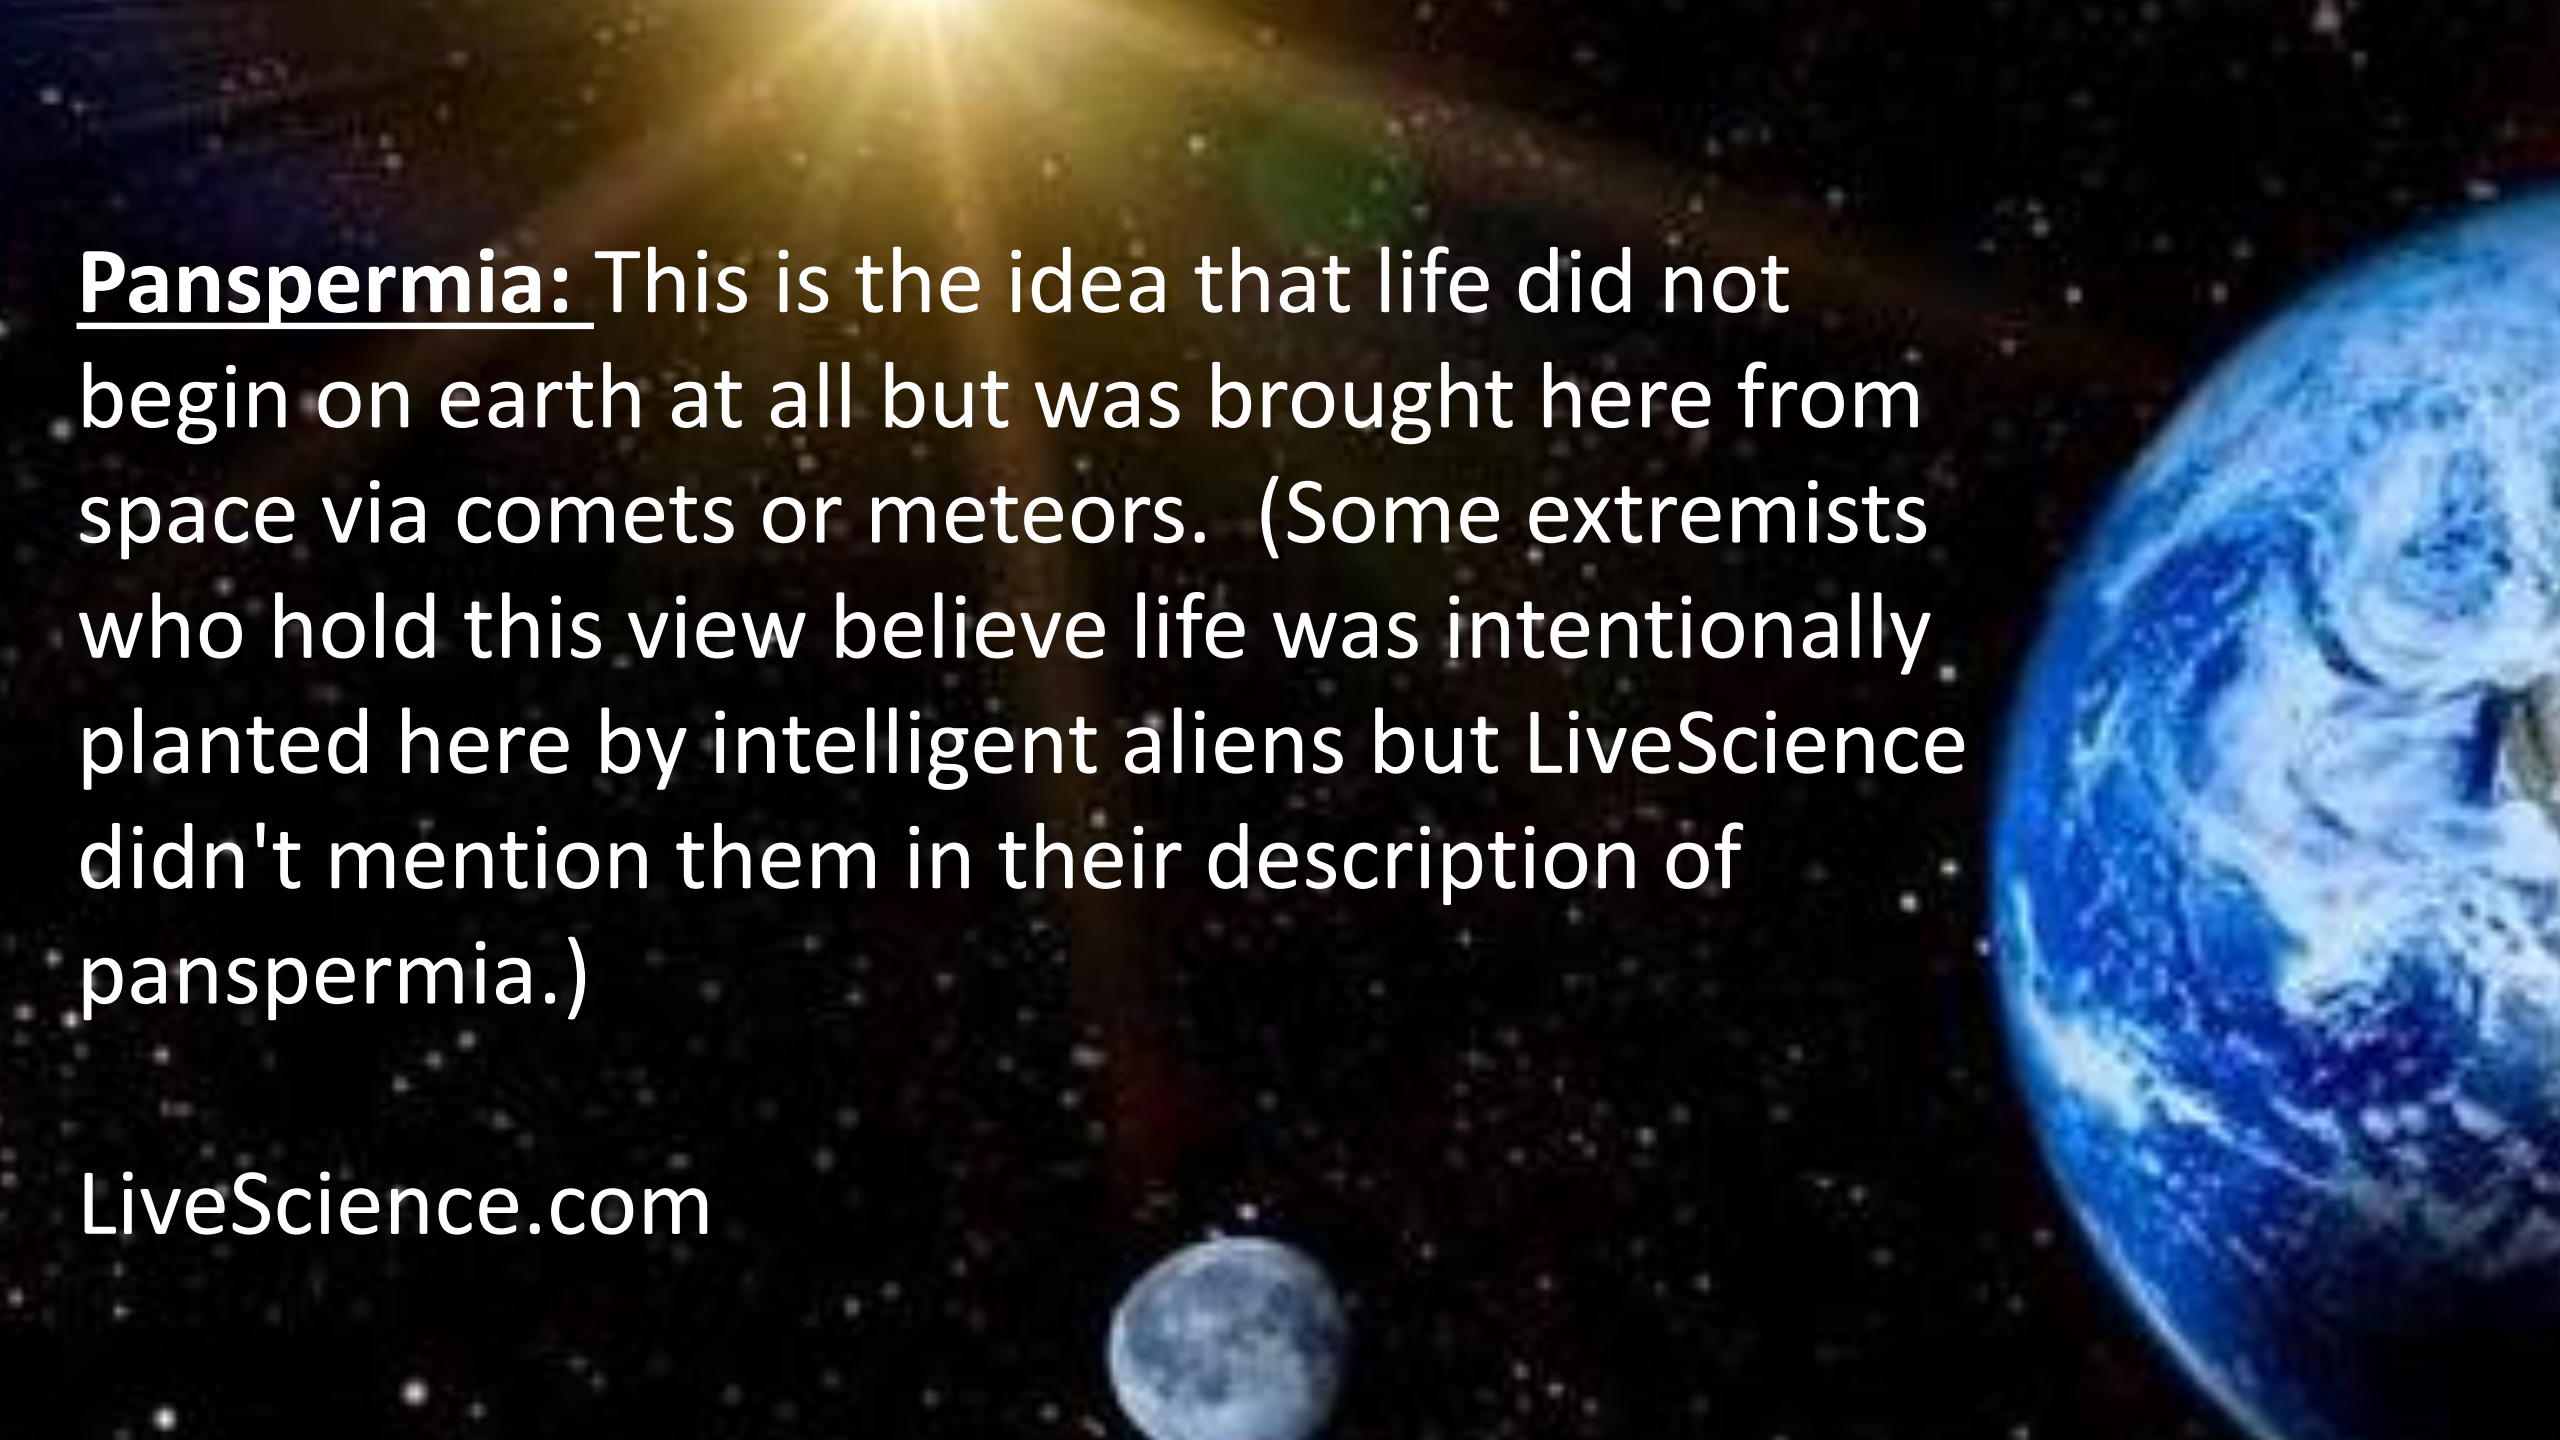

**Chilly Start:** Instead of super-hot, hydrothermal vents, some believe life began inside hundreds of feet of ice that supposedly covered the early oceans.

**RNA World:** Before DNA, some speculate that life began with RNA. Of course, they don't have a conclusive theory on the origin of RNA either.

**Simple Beginnings:** Instead of developing from complex molecules such as RNA, life might have begun with smaller molecules interacting with each other in cycles of reactions.

A cosmic background featuring a bright sun or star in the upper left, the blue and white horizon of Earth on the right, and the grey, cratered surface of the Moon at the bottom center. The background is filled with numerous small, distant stars.

**Panspermia:** This is the idea that life did not begin on earth at all but was brought here from space via comets or meteors. (Some extremists who hold this view believe life was intentionally planted here by intelligent aliens but LiveScience didn't mention them in their description of panspermia.)

LiveScience.com

**These are some of the efforts  
to explain our existence from  
a Non-God world view.**

# LAW OF BIOGENESIS

*Omne Vivum ex Vivo*  
*All Life (is) from Life*  
*Louis Pasteur*

**EACH ONE  
AFTER ITS KIND**

A vibrant, detailed painting depicting Noah's Ark. The scene is set in a lush, tropical environment with tall, dark trees and a bright, hazy sky. In the foreground, a large elephant stands prominently, surrounded by various other animals including giraffes, lions, tigers, and smaller mammals. People, dressed in traditional, colorful garments, are seen interacting with the animals. Some are standing, while others are sitting or kneeling. The overall atmosphere is one of a harmonious and bustling world. A blue rectangular box with white text is overlaid on the upper right portion of the image.

*Gen.1:31*    **Then God saw everything that He had made, and indeed it was very good. So the evening and the morning were the sixth day.**

**Let Us make man in Our Image,  
according to Our likeness;**

*Gen 1:26a*

Male and female He created them....

Uh-oh.

A close-up shot of two LEGO minifigures, a man and a woman, standing in a garden. The man, on the left, has brown hair and a mustache, wearing a yellow shirt and green shorts. The woman, on the right, has brown hair and is wearing a yellow shirt with a red and green floral pattern and green shorts. They both have surprised or concerned expressions. In the background, a blurry figure in a white dress and hat is visible, suggesting a wedding or formal event. The scene is set outdoors with green foliage and a path.
